PONDICHERRY

## ABOUT

Enthusiastic Software Developer with a strong foundation in programming and problem-solving. Skilled in Java, JavaScript, and basic software development concepts. Eager to apply technical knowledge to build efficient applications and grow in a challenging development environment.

## SKILLS

- Java, HTML,CSS, JavaScript

### PLATFORMS AND TOOLS

- Github, Arduino

### OFFICE TOOLS

- Power BI, Excel, MS word

## CERTIFICATIONS

- CCNA (Cisco certified Network Associate)
- Drone Technology certified by Atal Incubation Center-Pondicherry.
- WIPRO certified Java Full Stack

## EDUCATION

**BE** - Electronics and Communication Engineering - IFET College Of Engineering
Year of passing:2026
CPGA : 8.17 (till 6th sem)

**HSC (12th)** - Amalorpavam Higher Secondary School, Pondicherry
Year of passing: 2022
Percentage : 79.5%

**SSLC(10th)** - Amalorpavam Higher Secondary , Pondicherry
Year of passing - 2020
Percentage: 77%

## LINGUISTIC PROFICIENCY

English
(Full Professional Profiency)
Tamil
(Native or Bilingual Proficiency)

## WORK EXPERIENCE

### INTERN - WEB DEVELOPER

*LeMeinz Technologies Private Limited , Pondicherry* **(2024)**

- Gained hands-on experience in frontend and backend development through real-time projects.
- Improved skills in UI design, API integration, and working with web/app development frameworks.

### INTERN - PYTHON FULL STACK

VEI Technologies Pvt Ltd , Tindivanam **(2025)**

- Strengthened backend development skills using Python and frameworks like Django/Flask.
- Gained practical knowledge in database handling, SQL queries, and integrating frontend with backend.

### EMBEDDED SYSTEM & IOT TRAINEE-INDUSRTY

*TVS Training Services Ltd, Chennai* **(2025)**

- Gained practical experience working with microcontrollers, sensors, and circuit design.
- Improved skills in Embedded C, firmware testing, and hardware debugging.
- Learned PCB basics, wiring methods, and problem-solving for embedded systems.

### INTERN - DESIGNING AND PANNEL ASSEMBLER

*Mahaveerer FABS Pvt . Ltd , Chennai* **(2025)**

- Acquired hands-on experience in panel wiring, assembly, and electrical component identification.
- Learned to read and interpret design drawings and panel layouts (including basic AutoCAD understanding).
- Developed skills in quality checking, following safety standards, and working in a systematic process.

## AWARDS

- 2nd Prize – Project Expo at Dhanalakshmi Srinivasan College of Engineering ,Chennai
- 3rd Prize – Poster Presentation , IFET College of Engineering
- 3rd Prize - E-Gadgets project Expo,IFET College of Engineering
- 1st Prize - Basket ball and Throw ball womens conducted on 25th year annual sport meet
- Selected in 1st round of Smart India Hackthon in our college level

## PUBLICATIONS

- Arduino-Based Alcohol Detection Device: Enhancing Safety in Vehicle Operation through Sensor Technology, Asian Journal of Applied Science and Technology, Vol. 8, Issue 1, March 2025
- A Novel and Reliable SOS Alert Band System for Women Safety, Asian Journal of AppliedScience and Technology, Vol. 9, Issue 1, Jan–March 2024

## LEADERSHIP

**Class Representative**
Managed class coordination and communication
**Student In-Charge -Tamil Sangam**
Organized and led cultural events promoting Tamil language and heritage.

## PROFESSIONAL MEMBERSHIP

ISTE(Indian Society for Technical Education)

## ACADEMIC PROJECTS

### *Arduino Based Toll Tax System* (2nd sem)

- Developed an automated toll collection system using Arduino with sensors (IR/RFID) for vehicle detection and identification.
- Implemented real-time toll calculation and automatic transaction handling to ensure fast and accurate processing.
- Integrated LCD display and servo motor barrier mechanism to streamline traffic flow and enhance operational efficiency.

### VIRO SHIELD - INTELLIGENT DOOR AUTOMATION SYSTEM (6th sem)

- Initiated and led the creation of an automated entry control system integrating temperature screening sensors to enhance security and health safety. Managed hardware and software development efforts ensuring project success
- Enhanced safety and energy efficiency by integrating alert signals and auto-close functionality based on sensor feedback.

## HACKTHON PROJECT

### *SecureShe - Wearable Safety Device* (2024)

- Conceptualized and lLed the design of an offline GSM-based wearable safety device with nerve sensors on the foot thumb for discreet panic detection. The device triggers automatic SOS alerts using biometric and environmental sensors without mobile dependency.
- Enhanced user safety with quick-response mechanisms, LED/Vibration indicators, and reliable real-time activation.
